DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1 and 11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims recite a method for processing “a fresh whole garlic clove” (line 1). There is no support for processing “whole” garlic in the specification.

Claim Rejections - 35 USC § 103

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-8 and new claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Onove (U.S. Pat. No. 6,096,366) in view of Berger (U.S. Pat. No. 4,022,923), Isao (U.S. Pat. No. 5,260,090), Sakamoto et al (U.S. Pat. No. 3,615,599), Zaboli (U.S. Pat. No. 6,197,354 B1) The references and rejection are incorporated as cited in a previous Office action. Applicant's arguments filed September 9th, 2005 have been fully considered but they are not persuasive.

Response to Arguments

At page 4 of the remarks, applicant states, "the recipe described in the Onove reference calls for garlic cloves to be inter alia minced and mixed with olive oil before the freezing step. It is not known whether the mincing and mixing with olive oil inhibit the process of breaking the micrograins of garlic during the freezing process, which produces the effect produced by the present invention." This is not deemed persuasive for the reasons of record as evidenced by L. Harris (Garlic; Safe Methods to Store, Preserve, and Enjoy).

L. Harris teaches that peeled garlic cloves may be submerged in oil and stored in the freezer for several months. Applicant states in the specification (page 3, lines 20-22) that the process of expansion and contraction caused by the freezing and thawing of the water-based liquid contributes to the rupture of the micrograins, also applicant states that the fresh garlic cloves can be minced or chopped prior to or after processing (specification pg. 4 line 4). It does not appear that mincing or mixing with oils has an adverse effect on garlic and besides the micrograins themselves contain aromatic oils. With regard to claims 9-11, Onove teaches using peeled fresh garlic cloves.

Conclusion

1. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

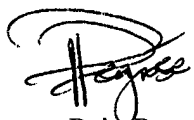

Art Unit: 1761

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
